PREFACE

(vii)

Module I

CHAPTER 1. Basic Probability Theory	1–70
1.1 Introduction	1
1.2 Set	1
1.3 Basic Terminology	3
1.4 Classical Definition of Probability	6
1.5 Axiomatic Definition of Probability	13
1.6 Conditional Probability	17
1.7 Independent Events	24
<i>Objective Questions</i>	66
<i>Problems</i>	68
CHAPTER 2. Random Variables: Probability Distribution and Expectation	71–122
2.1 Random Variable	71
2.2 Distribution Function of a Random Variable	73
2.3 Discrete Random Variables	75
2.4 Continuous Random Variables	79
2.5 Mean or Expectation of a Random Variable	83
2.6 Variance and Standard Deviation	85
<i>Multiple Choice Questions</i>	118
<i>Problems</i>	120
CHAPTER 3. Some Important Probability Distributions	123–179
3.1 Introduction	123
3.2 Binomial (or Bernoulli's) Probability Distribution	123
3.3 Recurrence or Recursion Formula for the Binomial Distribution	125
3.4 Mean and Variance of the Binomial Distribution	126
3.5 Poisson Distribution	134
3.6 Mean and Variance of the Poisson Distribution	135
3.7 Poisson Distribution as a Limiting Case of Binomial Distribution	136
3.8 Uniform (or Rectangular) Distribution	143
3.9 Mean and Variance of the Uniform Distribution	144

3.10	Exponential Distribution	...	147
3.11	Normal Distribution	...	152
3.12	Normal Approximation to Binomial Distribution	...	158
3.13	<i>t</i> -Distribution or Student's <i>t</i> -distribution	...	170
3.14	Chi-square (χ^2) Distribution	...	172
3.15	<i>F</i> -Distribution	...	173
	<i>Multiple Choice Questions</i>	...	176
	<i>Problems</i>	...	177
CHAPTER 4.	Transformation of Random Variables		180–191
4.1	Transformation of Discrete Random Variables	...	180
4.2	Transformation of Continuous Random Variables	...	180
	<i>Multiple Choice Questions</i>	...	190
	<i>Problems</i>	...	191
CHAPTER 5.	Tchebycheff's Inequality, Law of Large Numbers and Central Limit Theorem		192–213
5.1	Tchebycheff's Inequality	...	192
5.2	Convergence in Probability	...	201
5.3	Law of Large Numbers (LLN)	...	202
5.4	Central Limit Theorem (CLT)	...	208
	<i>Multiple Choice Questions</i>	...	211
	<i>Problems</i>	...	211
Module II			
CHAPTER 6.	Statistics		214–247
6.1	Introduction	...	214
6.2	Basic Terminology	...	214
6.3	Measures of Central Tendency	...	218
6.4	Standard Deviation	...	228
6.5	Coefficient of Variation	...	235
	<i>Objective Questions</i>	...	245
	<i>Problems</i>	...	245
CHAPTER 7.	Sampling Theory		248–272
7.1	Population and Sample	...	248
7.2	Sampling Distribution	...	249
7.3	Sampling Distribution of Sample Mean	...	252
7.4	Sampling Distribution of Sample Variance	...	257
	<i>Objective Questions</i>	...	270
	<i>Problems</i>	...	271
CHAPTER 8.	Estimation of Parameters		273–323
8.1	Introduction	...	273
8.2	Point Estimation	...	273
8.3	Unbiased Estimator	...	274

8.4	Consistent Estimator	...	276
8.5	Maximum Likelihood Estimation of Parameters	...	286
8.6	Interval Estimation: Confidence Intervals and Confidence Limits	...	303
8.7	Determination of Approximate Confidence Interval for the Mean of any Population	...	314
8.8	Sample Proportion and Population Proportion	...	316
8.9	Confidence Interval for Population Proportion	...	317
	<i>Multiple Choice Questions</i>	...	319
	<i>Problems</i>	...	320

Module III

CHAPTER 9. Testing of Hypotheses	324–374
9.1 Statistical Hypotheses	...
9.2 General Form of a Test: Critical Region, Two Types of Errors, Power of the Test, Level of Significance, Best Critical Region	...
9.3 Best Critical Region for Simple Hypotheses	...
9.4 One Sample Test for Population Mean	...
9.5 One Sample Test for Population Proportion	...
9.6 Two Sample Test for Population Mean	...
9.7 Two Sample Test for Population Proportion	...
9.8 Chi-square (χ^2) Test for Goodness of Fit	...
<i>Multiple Choice Questions</i>	...
<i>Problems</i>	...

Module IV

CHAPTER 10. Planar Graphs	375–396
10.1 Isomorphic Graphs	...
10.2 Planar Graphs	...
10.3 Kuratowski's Two Graphs	...
10.4 Dual of a Graph	...
10.5 Detection of Planarity	...
10.6 Homeomorphic Graphs	...
<i>Multiple Choice Questions</i>	...
<i>Problems</i>	...
CHAPTER 11. Graph Colouring	397–416
11.1 Chromatic Number	...
11.2 Chromatic Number of a Complete Graph (K_n)	...
11.3 Chromatic Number of a Circuit (C_n)	...
11.4 Chromatic Number of a Bipartite Graph ($K_{m,n}$)	...
11.5 Upper Bounds of Chromatic Numbers	...
11.6 Rules for Finding Chromatic Number of a Graph G	...
11.7 Chromatic Polynomial	...
11.8 Four and Five Colour Theorems	...
<i>Multiple Choice Questions</i>	...
<i>Problems</i>	...

Module V

CHAPTER 12. Theory of Groups	417–460
12.1 Set	... 417
12.2 Mappings	... 418
12.3 Binary Operation on a Set : Algebraic Structure	... 420
12.4 Groups	... 421
12.5 Elementary Properties of Groups	... 434
12.6 Integral Exponents	... 436
12.7 Addition Modulo m	... 443
12.8 Multiplication Modulo m	... 444
12.9 Congruence Relation	... 444
12.10 Cyclic Group	... 447
12.11 Symmetric Group and Permutation Group	... 453
<i>Multiple Choice Questions</i>	... 455
<i>Problems</i>	... 458
CHAPTER 13. Subgroups	461–485
13.1 Subgroups	... 461
13.2 Cosets	... 466
13.3 Normal Subgroups	... 474
13.4 Quotient Group	... 479
<i>Multiple Choice Questions</i>	... 482
<i>Problems</i>	... 484
CHAPTER 14. Homomorphism and Isomorphism	486–498
14.1 Homomorphism	... 486
14.2 Isomorphism	... 489
<i>Multiple Choice Questions</i>	... 497
<i>Problems</i>	... 498
CHAPTER 15. Ring, Integral Domain and Field	499–524
15.1 Ring	... 499
15.2 Subring	... 502
15.3 Integral Domain	... 510
15.4 Field	... 511
<i>Multiple Choice Questions</i>	... 522
<i>Problems</i>	... 524
APPENDIX	525–527
EXAMINATION PAPER	528–531
INDEX	533–537
